

KUM®
COSMETICS
Made in Germany

since 1919

Commitment to Quality

Delivering the highest quality with a focus on durability, precision, and superior performance.

Innovation and Creativity

At **KUM**®, we drive innovation and creativity to set new standards in the industry.

Trusted by Major Cosmetic Companies

Our products are trusted by leading cosmetic brands worldwide. A testament to **KUM**®'s unmatched quality and reliability.

Eco Friendly

We are dedicated to sustainability and environmental protection.

YOUR BRAND

Your logo in your colors and your design.

Your Customization

Every model is customizable with a round point or sharp point, with or without a waste container. Designed to perfectly fit your pencil.

WHY
KUM?

Dynamic Torsion Action

All of our sharpeners are equipped with our unique **KUM®** Dynamic Torsion Action® system. Under constant tension the blade adjusts dynamically to the forces bearing on the pencil while sharpening ensuring always perfect sharpening results, no matter what pencil casing is used (wood or plastic).

Blade

Our blades are hardened to 64 hrc to ensure longevity of the razor sharp cutting edge.

Double Blade System

In the world of cosmetic pencils, achieving the perfect point is paramount. That's why **KUM®** has spent years developing the Double-Blade System® for our series 6000 sharpeners.

Each **KUM®** Cosmetic Sharpener in the series 6000 can be equipped with two blades. The primary blade at the top sharpens the pencil to a fine point, while the second blade delicately shapes the round point.

High-precision positioning of the pencil within the sharpener body allows effective shaping of all types of cosmetics formulations and casings, including the most delicate formulations used in cosmetic pencils today.

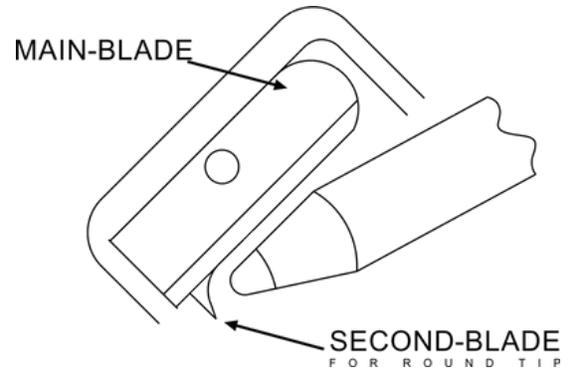

This innovative system is the result of **KUM®**'s tireless commitment to R&D, and in combination with precision manufacturing capabilities. Every detail has been meticulously considered to provide the most precise and effortless sharpening experience possible.

So whether you're a professional make-up artist or you are looking for the best possible cosmetic sharpener for your brand. What the **KUM®** Double-Blade System® offers the ultimate in precision and quality. Experience the difference for yourself and discover why **KUM®** is a leader in cosmetic pencil sharpening technology.

Cleaning Stick

Most of our sharpeners come with a cleaning stick to easily remove waxy residues from cosmetic formulations.

The high quality blades are sensitive, which is why we always recommend using our cleaning stick.

WHY KUMS?

In-House Production

This even includes machinery and moulds to ensure the highest possible degree of quality.

Quality Control

Takes place continuously during production in order to be able to react fast to any deviances from our high quality standards.

Innovation

Lies in our DNA. Finding solutions for all pencils is our everyday mission.

Versatility

Sharpeners for pencils of all cosmetic pencil diameters, formulations, and pencil casing materials.

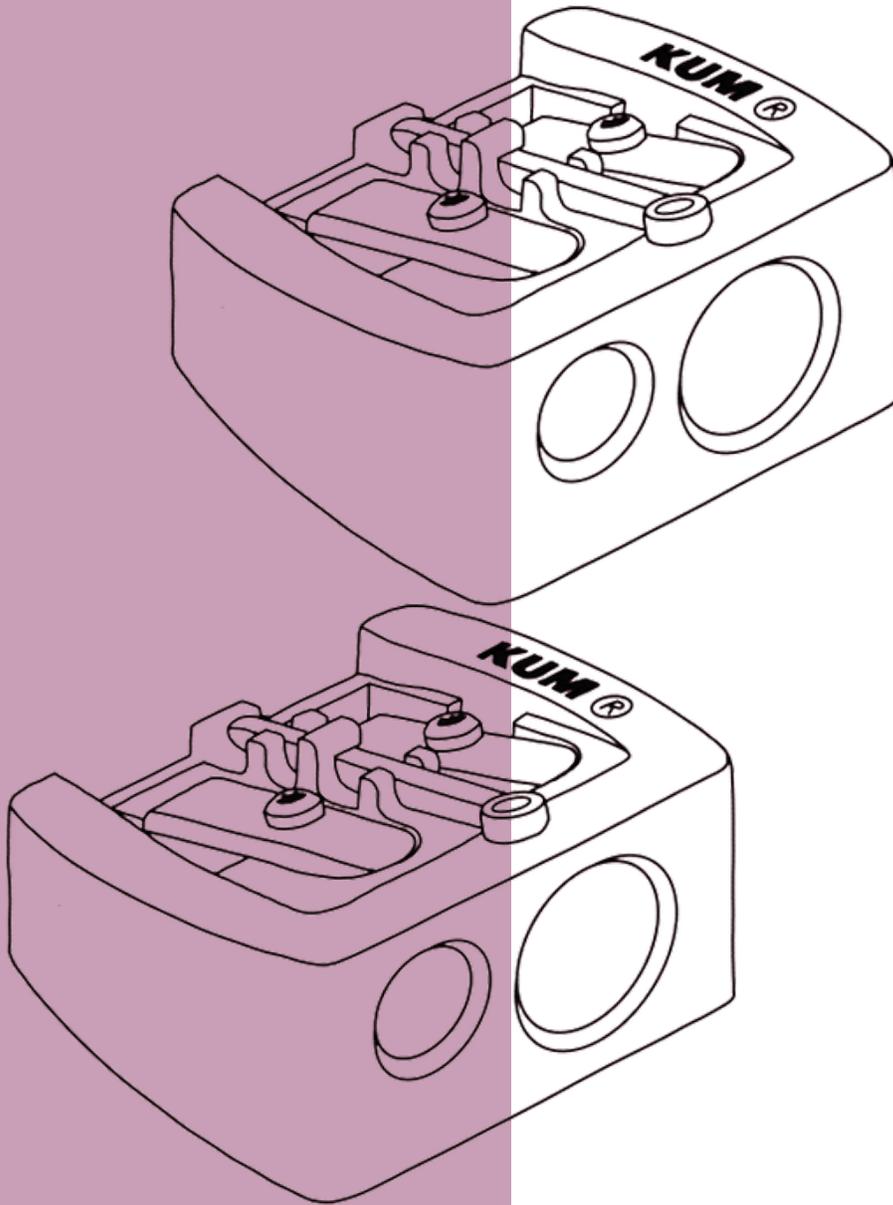

Patented Excellence

For over a century. We have patented groundbreaking ideas, taking innovation so seriously that some of our sharpeners are ahead of the pencils they were designed for.
